

Code editors, with HTML, CSS and JavaScript it will render out in your browser. All you have to do is go to the file and open in a browser to view how it looks. All of the below have different benefits and you should pick one that you can get comfortable with. You can style the coding area in the preferences on any of them, so you can have light text with a dark background or light background with dark text.

Open source editor

<http://www.apтана.com/>

Microsoft expression editor

<http://www.microsoft.com/en-US/download/details.aspx?id=36179>

Sublime Text: The text editor you'll fall in love with. Sublime Text is a sophisticated text editor for code, markup and prose. You'll love the slick user interface, extraordinary features and amazing performance. <https://www.sublimetext.com>

Atom: At GitHub, we're building the text editor we've always wanted. A tool you can customize to do anything, but also use productively on the first day without ever touching a config file. Atom is modern, approachable, and hackable to the core.

<https://atom.io/>

brackets : A modern, open source text editor that understands web design .

<http://brackets.io/>

Light Table : is the next generation code editor. Light Table Connects you to your creation with instant feedback and showing data values flow through your code.

<http://lighttable.com>

Dreamweaver CC. All new in 2015. Create responsive websites faster and easier than ever. The all-in- one web authoring toolset now helps you build modern sites that adapt to fit any size screen, and you can make them look great with beautiful, high-quality images from new Adobe Stock. <http://www.adobe.com/ca/products/dreamweaver.html>

Notepad++ is a free (as in "free speech" and also as in "free beer") source code editor and Notepad replacement that supports several languages. Running in the MS Windows environment, its use is governed by GPL License.

<https://notepad-plus-plus.org/>

Komodo Edit is the free and Open-Source counterpart of Komodo IDE. Looking for a powerful editor without all the advanced functionality an IDE comes with? Komodo Edit is for you.

<http://komodoide.com/komodo-edit/>

PSPad - text editor for developers for Microsoft Windows systems

<http://www.pspad.com/>

Source code editors evolved from basic text editors, but include additional tools specifically geared toward handling code.

#### WYSIWYG editors

---

HTML editors that support What You See Is What You Get ([WYSIWYG](#)) paradigm provide a user interface similar to a word processor for creating HTML documents, as an alternative to manual coding. Achieving true WYSIWYG however is not always possible.

## Welcome to VirtualBox.org!

---

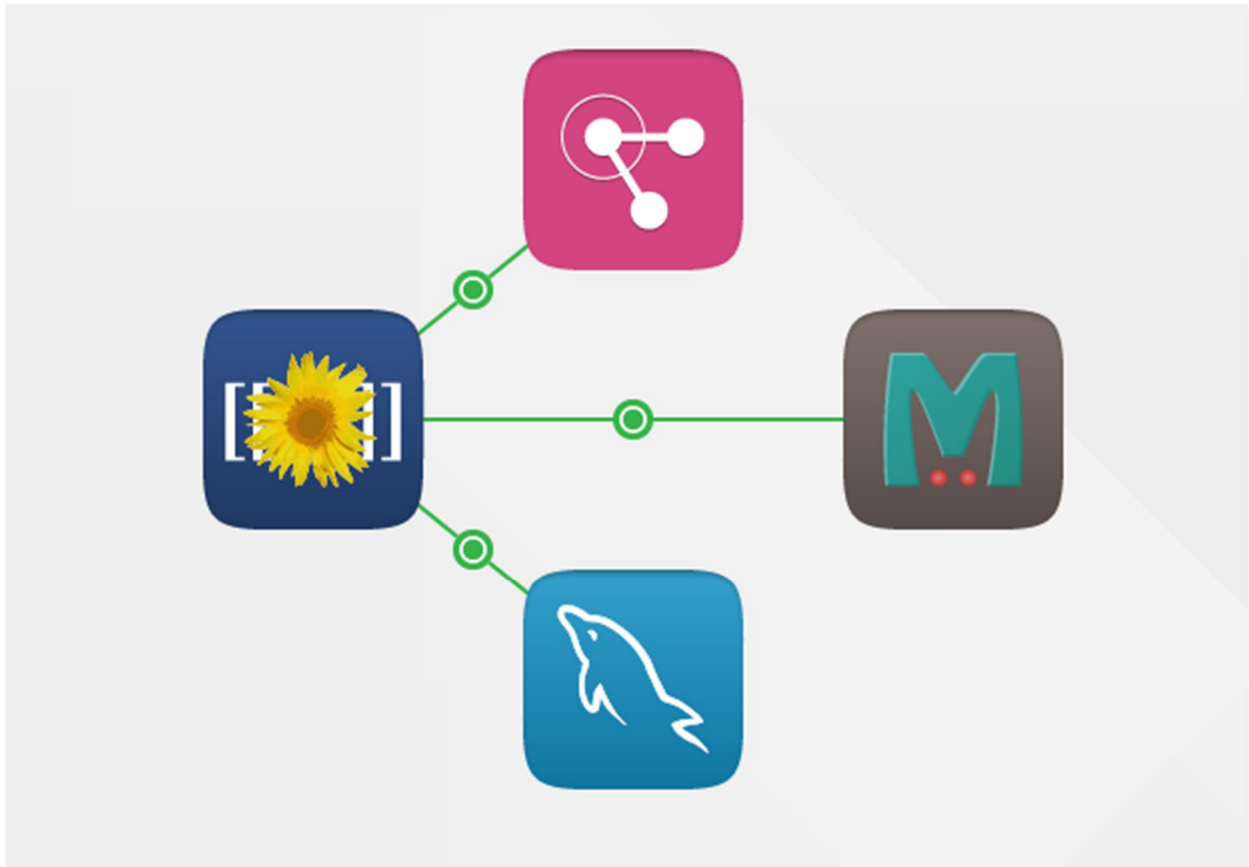

VirtualBox is a powerful x86 and AMD64/Intel64 virtualization product for enterprise as well as home use. Not only is VirtualBox an extremely feature rich, high performance product for enterprise customers, it is also the only professional solution that is freely available as Open Source Software under the terms of the GNU General Public License (GPL) version 2. See "About VirtualBox" for an introduction.

Presently, VirtualBox runs on Windows, Linux, Macintosh, and Solaris hosts and supports a large number of guest operating systems including but not limited to Windows (NT 4.0, 2000, XP, Server 2003, Vista, Windows 7, Windows 8), DOS/Windows 3.x, Linux (2.4, 2.6 and 3.x), Solaris and OpenSolaris, OS/2, and OpenBSD.

VirtualBox is being actively developed with frequent releases and has an ever growing list of features, supported guest operating systems and platforms it runs on. VirtualBox is a community effort backed by a dedicated company: everyone is encouraged to contribute while Oracle ensures the product always meets professional quality criteria.

antastico F3 — installs over 640 Skripts

Fantastico De Luxe is an amazing **cPanel/PHP** based Web application. It integrates with **cPanel** and gives you and your clients the ability to automagically install below listed popular Open Source Applications. With Fantastico the installation procedure of all of the following scripts takes only seconds and can be performed by novices without the need of setting up MySQL databases, importing structure, chmoding files and without the need of other tasks usually associated with installations:

### **Discussion Boards:**

**phpBB2** ([visit site](#))

- very popular "forums" or "message board" solution

**SMF** ([visit site](#))

- another popular choice for a full featured "forums" or "bulletin board"

### **Portals/CMS:**

**PHP-Nuke** ([visit site](#))

- a powerful portal solution with many modules, blocks and addons available

**phpWCMS** ([visit site](#))

- a CMS system

**phpWebSite** ([visit site](#))

- a CMS portal site with many modules and addons available

**Mambo** ([visit site](#))

- a dynamic web content management system (CMS), capable of building sites from several pages to several thousand

**Siteframe** ([visit site](#))

**Typo3** ([visit site](#))

- a Web content management framework

**TikiWiki CMS/Groupware** ([visit site](#))

- Tiki features a Wiki, Image galleries, File galleries, Forums, Polls, Chat, RSS feeds, Articles, Submissions, Weblogs, Webmail, Surveys, Trackers, Newsletters and more. Themes can be created using CSS. Everything is customizable

**Xoops** ([visit site](#))

- a CMS portal site with many modules and addons available

**Drupal** ([visit site](#))

**Joomla!** ([visit site](#))

- a Content Management System (CMS) created by the same team that brought the Mambo CMS to its current state of stardom

**Geeklog** ([visit site](#))

**Zircula** ([visit site](#))

- another CMS that allows you to rapidly build websites for any application including all forms of content management

**eCommerce:**

NOTE: In addition, our cPanel Pro plans also come with "Interchange" and "Agora" shopping carts.

**CubeCart** ([visit site](#))

- a popular shopping cart system

**osCommerce** ([visit site](#))

- a powerful highly configurable eCommerce shopping cart solution

**ZenCart** ([visit site](#))

- another user-friendly open source shopping cart system

**Customer Support Systems:**

**PHP Support Tickets** ([visit site](#))

- powerful Support Ticketing System to help you help your visitors

**Support-Logic Helpdesk**

**Support Services Manager**

- a powerful system for providing your visitors and clients with support services

**osTicket** ([visit site](#))

**Crafty Syntax Live Help (CSLH)** ([visit site](#))

**Help Center Live** ([visit site](#))

**F.A.Q.:**

**FAQMasterFlex** ([visit site](#))

- a database-driven application for creating and maintaining Frequently Asked Questions (FAQs)

**Blogs:**

**b2evolution** ([visit site](#))

**Nucleus** ([visit site](#))

**WordPress** ([visit site](#))

- the most popular blogging software script there is

**Image Galleries:**

**4images Gallery** ([visit site](#))

- your own online photo gallery

**Gallery** ([visit site](#))

- probably the most popular image gallery script

**Coppermine Photo Gallery** ([visit site](#))

- a feature-rich photo gallery script with MySQL database, user management, private galleries, automatic thumbnail creation, film strip, and a template system for customization

**Website Builder:**

**Templates Express**

- a series of static templates which can be installed to start building a website even if you do not want to learn how to manage a CMS

### **Soholaunch Pro Edition** ([visit site](#))

- commercial template system

### **Polls and Surveys:**

#### **Advanced Poll** ([visit site](#))

- polling system with multiple polls, templates, IP-Logging, IP-Locking, cookie support, etc.

#### **phpESP** ([visit site](#))

- a PHP/MySQL-driven application to let non-technical users create surveys

#### **LimeSurvey** ([visit site](#))

- surveying tool that allows you to develop, publish, manage surveys

### **Mailing List:**

#### **PHPlist** ([visit site](#))

NOTE: Our plans ALSO come with "Mailman" - an even better mailing list program!

### **Wiki:**

#### **PhpWiki** ([visit site](#))

- a PHP clone of WikiWikiWeb, a web site system where anybody can edit the pages right through the web browser, without any authentication

### **Project Management:**

#### **PHProjekt**

- a project managing system for tasks and groups

#### **dotProject** ([visit site](#))

### **Other Scripts:**

#### **Moodle** ([visit site](#))

- Moodle is a course management system designed to help educators create quality online courses

#### **Noah's Classifieds** ([visit site](#))

- run your own Classified ads website!

#### **OpenX** ([visit site](#))

- advertising script and service website

#### **Dew-NewPHPLinks**

- Dew-Code is a resource for aspiring coders - a search engine, web directory, link exchange open source php script

#### **Open-Realty** ([visit site](#))

- professional but free tool for real estate agents to put their offers online

#### **PHPauction** ([visit site](#))

- host your own auctions site!

#### **phpCOIN** ([visit site](#))

- phpCOIN is a PHP/MySQL based package for hosting resellers to manage clients, orders, invoices, etc. phpCOIN supports "pay links" as the method of billing, and permits returning client purchases, secure client/admin login, permits client access to own information (view / print), eMail notifications (template based), auto-send of due invoices, auto-generate recurring invoices,

language file support, and theme support. Includes following modules: Articles, Contact forms, FAQ, HelpDesk, Custom Content Pages, and Search Site function.

**AccountLab Plus** ([visit site](#))

- a commercial Netenberg script for Hosting providers

**phpFormGenerator** ([visit site](#))

**WebCalendar** ([visit site](#))

- a PHP application used to maintain a calendar for one or more persons
